ANNEX 1

1. Definitions

For the purposes of this Annex:

“Reference Index” means subject to the provisions of Clause 4 (Adjustment to and Replacement of Reference Index), Clause 5 (Re-Basing of Reference Index), Clause 6 (Corrections of Reference Index) and Clause 7 (Other Extraordinary Circumstances) below, the unrevised Harmonised Index for Consumer Price (“HICP”) (excluding tobacco) for the European Monetary Union (also defined by the Sponsor as the Monetary Union Index of Consumer Prices ex-tobacco (“MUCIP”)) for the Euro-Area as calculated by the Sponsor;

“Sponsor” means Eurostat and/or, as the context requires or permits, any successor sponsor accepted by the Calculation Agent.

2. **Index Linked Coupon Rate**

In respect of each Note, the Index Linked Coupon Rate payable on each Interest Payment Date with respect to each Inflation-Linked Interest Period shall be equal to:

Year on Year Inflation + 1.10%

subject to the minimum rate described below.

Where:

“Year on Year Inflation” means a percentage calculated in accordance with the following formula:

$$\left(\frac{CPI_{FINAL} - CPI_{INITIAL}}{CPI_{INITIAL}} \right)$$

“CPI_{INITIAL}” means in respect of each Inflation-Linked Interest Period, the Reference Index for the month of December prior to the start of the **previous** Inflation-Linked Interest Period (in the case of the first such Inflation-Linked Interest Period CPI_{INITIAL} will be the Reference Index published for the month of December 2005) published by the Sponsor; and

“CPI_{FINAL}” means in respect of each Inflation-Linked Interest Period, the Reference Index for the month of December prior to the end of the **previous** Inflation-Linked Interest Period (in the case of the first such Inflation-Linked Interest Period CPI_{FINAL} will be the Reference Index published for the month of December 2006) published by the Sponsor,

as determined by the Calculation Agent.

The minimum rate for the Index Linked Coupon Rate is equal to 1.50 per cent per annum.

Example: Considering CPI_{FINAL} equal to 103;

Considering CPI_{INITIAL} equal to 100,

The Index linked Coupon Rate formula applies as follows:

$$1.10\% + [(103-100)/100] = 1.10\% + 3\% = 4.10\%$$

The above merely represents an example in order to explain the formula for the calculation of the Index Linked Coupon Rate. The data used for the example do not reflect the value of the Reference Index published by the Sponsor at any time. The Calculation Agent remains solely responsible at any time for the calculation of the Index Linked Coupon Rate.

3. Notification of Index Linked Coupon Rate

As soon as reasonably practicable after calculating or otherwise determining each Index Linked Coupon Rate, the Calculation Agent shall give notice of the relevant amount to the Issuer.

4. Adjustment to and Replacement of Reference Index:

- (a) If the Reference Index is (i) not calculated and announced by the Sponsor but is calculated and announced by a successor sponsor provided that such successor has become the agency or authority having jurisdiction to measure the specific type of inflation that was measured by the Reference Index or is otherwise acceptable to the Calculation Agent or (ii) replaced by a successor index (as determined by the Calculation Agent in its sole discretion), then the Reference Index will be deemed to be the index so calculated and announced by that successor sponsor or that successor index, as the case may be.
- (b) If the Sponsor fails to calculate and publish the Reference Index prior to any date on which it is required for the purposes of performing any calculation hereunder (and (a) above doesn't apply), then the Calculation Agent shall calculate the level of the Reference Index using, in lieu of a published level for the Reference Index, the following formula:

$$\text{Level}_w \times (\text{Level}_y / \text{Level}_z)$$

“Level_w” means the level for the Reference Index which was published by the Sponsor for the month falling 12 months prior to that for which the Reference Index is being calculated; and

“Level_y” means the level for the Reference Index which was published by the Sponsor for the last previously occurring month on which such Reference Index was published; and

“Level_z” means the level for the Reference Index which was published by the Sponsor for the month falling 12 months prior to the last previously occurring month on which such Reference Index was published;

In the event that the Sponsor fails to calculate and publish the Reference Index prior to any date on which it is required for the purposes of performing any calculation hereunder for a period of 3 consecutive months or more, then the Sponsor shall be deemed to have ceased publication of the Reference Index altogether and the provisions of Clause 7 (Other Extraordinary Circumstances) below shall apply.

5. Re-Basing of Reference Index

If the Reference Index is re-based (the “Rebased Index”), the Rebased Index will be used for the purposes of determining the Reference Index; provided however, that the Calculation Agent

shall make adjustments to the past fixings of the Rebased Index so that the Rebased Index reflects the same rate of inflation as the Reference Index before it was rebased. Any such rebasing shall not affect any prior coupon payments.

6. Corrections of Reference Index

Notwithstanding the fact that the level of the Reference Index published in respect of such date is subsequently revised by the Sponsor (including any revision due to the original level being a provisional level), the Calculation Agent shall determine the amount that is payable using the level published prior to any such revision except where such revision is made in order to correct a manifest error in the publication of such index (as determined by the Calculation Agent in its sole discretion), in which event the Calculation Agent shall use the level as so corrected.

7. Other Extraordinary Circumstances

If

- (a) on or prior to the publication of the Reference Index the Sponsor makes a material change in the formula for or the method of calculating the Reference Index or in any other way materially modifies the Reference Index (other than in a way which would constitute (a) a Re-basing of the Index (as defined below) or (b) a modification prescribed in that formula or method to maintain the Reference Index in the event of changes in constituent prices or items and other routine events); or
- (b) there should occur any circumstances in relation to the Reference Index which prevents the Calculation Agent from determining the level of the Reference Index for the purposes of performing any calculation hereunder; or
- (c) the Reference Index ceases to be calculated and published altogether by the Sponsor or by any successor thereof, and in each case, such occurrence, circumstance or cessation is not covered by the provisions above;

then the Calculation Agent will use any substitute index or formula and make such amendments, adjustments and corrections to any such index, formulae or any applicable criteria as it shall in its sole discretion deem appropriate in order to calculate the amounts payable hereunder.

8. Determinations by the Calculation Agent

All determinations, calculations or valuations made by the Calculation Agent under of pursuant to the terms of the Notes shall be made in its sole and absolute discretion and the Calculation Agent shall be solely responsible for the determination and calculation of any and all determinations, calculations or valuations in accordance with the terms of the Notes. All such determinations, calculations or valuations made by the Calculation Agent shall be conclusive and binding. The Calculation Agent shall not be liable for any loss, liability, cost, claim, action, demand or expense (including without limitation, any costs, charges and expenses paid or incurred in disputing or defending any of the foregoing) arising out of or in relation to or in connection with its appointment or the exercise of this functions, except such as may result from its own wilful default, negligence or bad faith or that of its officers or agents.

Nothing contained herein shall prevent the Calculation Agent from dealing in these Notes or from entering into any related transactions, including without limitation any swap or hedging transactions, with the Issuer or any holder of Notes.

9. **Unwind Costs**

Where used in connection with these Notes, “Unwind Costs” means the Euro value of any transfer or stamp tax costs, early redemption or termination cost, if any, borne by the Issuer or any hedge counterparty of the Issuer, as determined by the Calculation Agent, in relation to any swap agreement, financing arrangement or other hedging transaction entered into by or on behalf of the Issuer and/or such hedge counterparty.

Annex 2

Information about the Index

The information contained in this Annex 2 relating to the Reference Index consists of extracts from or summaries of information that is publicly available (unless otherwise stated). Neither the Issuer nor the Guarantor has independently verified any such information, and neither accepts any responsibility for error or omission, other than accepting responsibility for accurately reproducing and/or summarising the information relating to the Reference Index. Investors may acquire such further information as they deem necessary in relation to the Reference Index from such publicly available information as they deem appropriate. Investors should make their own investment, hedging and trading decisions (including decisions regarding the suitability of this investment), based upon their own judgment and upon advice from such advisers as such investors deem necessary and not upon any view expressed by the Issuer or the Guarantor.

Given the highly specialised nature of these Notes, the Issuer and the Guarantor consider that they are only suitable for highly sophisticated investors who are able to determine themselves the risk of an investment linked to indexes.

Consequently, if you are not an investor who falls within the description above you should not consider purchasing these Notes without taking detailed advice from a specialised professional adviser.

Summary The Monetary Union Index of Consumer Prices ex-tobacco (“MUCIP”) is an aggregation of relevant Harmonised Indices of Consumer Prices for and reflects consumer price inflation (excluding tobacco) in those EU member states that are members of the Eurozone – having adopted the euro as their currency as participants in the third stage of Economic and Monetary Union.

General Information Harmonised Indices of Consumer Prices (“HICPs”) are indices of inflation compiled according to methodology developed by the national statistical institutes of member states of the European Union in conjunction with Eurostat.

HICP figures are harmonized inflation figures required under Article 121 (consolidated version) of the Treaty establishing the European Community. They are designed for international comparison of consumer price inflation.

HICP indices cover “household final monetary consumption expenditure”. The relative importance of consumers’ expenditure in terms of particular goods or services varies from country to country. Therefore, there is no uniform basket applying to all member states.

Compilation Individual countries first publish their own HICP figures in conjunction with their consumer price indices. Following each country’s publication of its own HICP figures, Eurostat aggregates these and publishes aggregate HICP figures for the European Union (the European Index of Consumer Prices or EICP), for the Eurozone (the Monetary Union Index of Consumer Prices or MUICP) and for the European Economic Area (the European Economic Area Index of Consumer Prices or EEAICP).

Revisions and Publication Eurostat generally publishes MUICP figures approximately 16 to 18 days following the end of the relevant month. MUICP figures as published by Eurostat are occasionally revised after publication upon more accurate data becoming available. The Index as used in connection with the Notes, however, consists only of the unrevised figures first published by Eurostat (disregarding preliminary estimates). The tables of historical data found on the main pages of Eurostat's website (<http://europa.eu.int/comm/eurostat/>) contain the revised figures and therefore will not reflect exactly the development of the Index. Unrevised figures can be obtained by subscription to Eurostat's New Cronos database. The most convenient source of information about the development of the Index is currently the internet site of Agence France Trésor (<http://www.aft.fr/oat/us/ipceuro.html>) as the Index is the same as the index used to calculate payments under the French Republic's OATei securities.

Disclaimer on behalf of Eurostat The Notes are not in any way sponsored, endorsed, sold or promoted by Eurostat. Eurostat has no obligation to take the needs of Bondholders into consideration in composing, determining or calculating the Index (or causing the Index to be calculated). In addition, Eurostat makes no warranty or representation whatsoever, express or implied, as to the results to be obtained from the use of the Index and/or the level at which the Index stands at any particular time on any particular day or otherwise, and shall not be liable, whether in negligence or otherwise, to any person for any error in the Index or under any obligation to advise any person, including, without limitation, the Issuer or Bondholders, of any error therein.
